Johne's Disease Risk Level Reminder - CHeCS

If you are looking to buy or sell stock it is important to know your own herd's Johne's disease risk level, as well as that of any cattle that you might add to your herd.

Level 1 – There have been at least three clear annual herd tests and there is a Johne's Disease herd health plan in place. This is the lowest level of risk

Level 2 – There has been at least one clear herd test but the herd does not yet qualify for Level 1 status. There is a Johne's disease herd health plan in place

Level 3 – Three per cent or less of the herd were identified as reactors at the most recent herd test. There is a Johne's disease herd health plan in place

Level 4 – More than three per cent of the herd were identified as reactors at the most recent herd test. There is a Johne's disease herd health plan in place

Level 5 – This includes herds without a health plan for Johne's disease, herds that not adhere to the mandatory elements of the health plan and herds that do not carry out the required testing. This is the highest level of risk.

PLEASE NOTE: IMPORTANT RULE ABOUT BUYING AND SELLING AND RISK STATUS!

It is important to remember that if an animal of a lower risk level status is added to your herd, if it is ever sold on from your holding it must be sold as its original risk level status (i.e. a **Risk Level 3** animal added to a **Risk Level 2** herd must remain as **Risk Level 3** if sold again).

However, animals added from a higher Risk Level Status herd to a lower Risk Level Status herd take on the status of the herd that they are added to and must be sold as such (i.e. a **Risk Level 1** animal added to a **Risk Level 4** herd would then have to be sold as **Risk Level 4** in the future).

IMPORTANT NOTICE TO VENDORS & PURCHASERS

ARRIVAL OF STOCK - Arrival of stock – Friday 16th May 1pm to 5pm – Saturday 16th May 7am to 9am.

RESERVE PRICES - Any vendor wishing to place a reserve price on any lot must inform the auctioneers before the sale of the animal commences.

\STRAW - A limited amount of bedding straw will be provided.

IMPORTANT NOTICE TO PROSPECTIVE PURCHASERS

SETTLEMENT & CLEARANCE OF STOCK

All lots must be settled on the day of purchases.

Completion of the registration slip on the next page is essential for parties who have not dealt with the market before.

Agents and customers wishing to purchase on behalf of another party must contact Darlington Farmers Auction Mart 48 hours prior to the sale.

No lots can leave the site without a 'pass slip' being issued by the livestock office.

For further information or help contact

General Information & Sale Notes

LOCATION: Darlington Farmers Auction Mart, Humbleton Park, Darlington, Durham, DL2 2XX
T: 01325 464529
E: info@dfam.co.uk
www.dfam.co.uk

METHOD OF SALE: All pedigree cattle will be sold in guineas (105 pence) and strictly in catalogue order, unless any alteration is announced by the Auctioneers. Commercial Cattle will be sold in £'s per head.

COMMISSIONS: The Auctioneers will dutifully execute commission bids to purchase for buyers unable to attend the sale personally, upon the receipt of written instructions.

Any cattle sold outside of the sale ring must be booked through the office, full commission will be charged. DFAM will charge a 5p in the Guinea Commission to the vendor on all pedigree cattle. DFAM will charge 3.75% Commission on all the commercial cattle. No commission will be charged to the buyer.

SETTLEMENT AND CLEARANCE OF STOCK: Settlement in full is due immediately at the close of the Sale. No animal may leave the Sale Premises without an official 'Pass Slip', obtainable only from the Auctioneers upon settlement. Purchasers unable to remove their stock on the day of sale can arrange overnight accommodation with the Auctioneers on the understanding that all cattle are at the Purchasers' risk.

REGISTRATIONS: All Pedigree stock in the sale are registered with the British Limousin Cattle Society, Concorde House, 24 Warwick New Road, Leamington Spa, Warwickshire, CV32 5JG. (Tel 02476 696500)

PEDIGREE TRANSFERS: Official Pedigree transfers will be affected by the British Limousin Cattle Society as soon as possible after the Sale.

SEMEN ROYALTY SCHEME BULL REGISTER: Purchasers are asked to note that where a female is catalogued as being served/inseminated by a 'Semen Royalty' Sire the appropriate royalty will be payable by the purchaser prior to registration of the calf.

VETERINARY INSPECTION: No inspections will be carried out at this sale.

HERD HEALTH: As stated declared by the Vendor in this catalogue or from the rostrum.

ANY ANIMAL NOT IN POSSESSION OF THE REQUIRED DOCUMENTS WILL NOT BE OFFERED FOR SALE WITHOUT THEIR RESPECTIVE PASSPORT DOCUMENTATION

IMPORTANT NOTICE TO VENDORS & PURCHASERS

Timetable of Events	
Friday 15 th May	Saturday 16 st May
ARRIVAL OF STOCK 1pm - 5pm	ARRIVAL OF STOCK 7am - 9am
CATTLE VIEWING 4pm to 6pm	SHOW COMMENCES 10.00am SALE COMMENCES 12 noon

ONLY BULLS which are ADEQUATELY TRAINED TO BE LED BY HALTER will be eligible to show. Those unhaltered will be sold at the end of the pedigree sale for health and safety reasons.

UK TAGS: All cattle entered for the Sale will have their UK Tags examined as an integral part of the pre-sale inspection procedure.

The Sale will be held subject to the Auction Rules, Conditions of Sale.

The proceeds of Sale are guaranteed by the Auctioneers, who will account to Vendors. Such guarantee however, does not extend to the animals sold for export, to which special conditions apply.

STRAW: Straw will be provided by the Auctioneers.

ANIMAL WELFARE: Vendors and Purchasers should note the CODE OF PRACTICE published by the Livestock Auctioneers' Market Committee for England and Wales IS OPERATIVE and that weak, unhealthy or injured stock will be refused entry by the Auctioneers. Enquiries should be directed through the market office to the Auctioneers' ANIMAL HEALTH & WELFARE OFFICER.

HOW TO USE GENETIC INFORMATION IN THIS CATALOGUE

Sale catalogues contain specific information relating to the genetics of each animal. This is a short explanatory note to assist when selection decisions are being made.

400	713
500	0
Scanned	YES

Callouts 1, 2, 3, 4, 5, and 6 are placed around the document to highlight specific information.

1 Birth Type

'Got by AI' indicates whether the calf was a result of an AI service. If blank, the dam was naturally served. 'Natural calf' indicates the calf was born to its biological dam. 'ET calf' indicates the calf was born as a result of embryo transplant.

2 Myostatin

"Not tested" indicates that no Myostatin test is currently available for the animal. Full details on the Myostatin variants and their effects on performance can be found on the Limousin Society website www.limousin.co.uk, search in 'performance programmes'. In summary:

The Variants:

F94L	Animals with two copies of this gene (ie F94L/F94L) exhibit an increase in muscling (by up to 19%) with no associated increased in calving difficulty, lowered fertility or longevity and by far the majority of animals in the breed carry this gene. Heterozygous animals (those with one copy of the gene) also exhibit these characteristics but not to the same degree.
NT821	Animals with two copies of the gene (ie nt821/nt821) will exhibit characteristics of larger loin depths, reduced fat depths and large, rounded rump and thighs. However, unlike F94L, animals with two copies may also have slightly heavier birth weights bringing with it the potential for more difficult calvings, If animals are 'heterozygous' with F94L (ie F94L/nt821) they will still exhibit quality carcass characteristics but are less likely to be affected by more difficult calvings.
Q204X	Animals with two copies of the gene (ie Q204X/Q204X) will exhibit characteristics of larger loin depth, reduced fat cover and greater meat tenderness. However, they may also have the potential to exhibit larger birth weight and, if females, slightly reduced milking ability. Animals that are 'heterozygous' with F94L (ie F94L/Q204X) will still exhibit quality carcass characteristics but are less likely to be affected by larger birth weights and reduced milking ability.

Two further variants of Myostatin exist in the population but are relatively uncommon in their occurrence. Known as nt419 and E291X, their effects are similar to nt821 and Q204X respectively.

The recognised benefits of Myostatin are:

- ✓ **Increased Meat Yield** – by up to 19%.
- ✓ **More feed efficient**
- ✓ **Higher meat quality** – increased tenderness, reduced fat content, higher polyunsaturated fats

Using Myostatin information

An important factor to remember is that carcass traits (muscling, fat cover etc), calving traits and milk traits in cattle are controlled by MANY genes. Myostatin is only one of them and, as such, it is not an absolute predictor of an animal's performance.

A Myostatin genotype is a further bit of information that may help your decision, but it should be used in conjunction with wider information such as Estimated Breeding Values (EBVs), which bring together information of actual performance from the animal itself, its herdmates and its relatives to predict genetic merit, and your own judgment on type and pedigree.

3 Genetic Colour

Colour and polled/horned genes typically come in pairs called alleles. One is inherited from the sire and one from the dam. Where an animal's alleles are the same, it is said to be 'Homozygous' (Hom.) Where the alleles are different (because there is more than one variant of the gene, the animal is said to be 'Heterozygous' (Het.)

"Hom. Red" – animals will be red and will pass on red genes.

"Hom. Black" – animals will be black and will pass on black genes. All calves will be black, since black colour genes are dominant.

"Het. Black" – animals will be black and will pass on either a red or black gene.

"Het. Red" – animals will be red and will pass on a red gene or a colour gene known as the 'wild type' that is non-colour determinate. (The coat colour of calves inheriting the wild type gene will be governed by the gene they inherit from the other parent. It is rare, but it is also possible for an animal to be homozygous for the wild type gene, in which case they will be reddish/brown to brownish/black).

4 Genetics for Horned/Polled Status

A bull that is "Hom. Polled" - will be polled himself and all calves will be polled (since he only has polled genes to pass on and they are dominant).

A bull that is "Het. Polled" – will be polled himself and will produce some polled and some horned calves (assuming the cows are all horned).

A bull that is "Hom. Horned" – will be horned himself and will pass only horned genes to his calves.

For more information on both Genetic Colour and Polled/Horned, go to www.limousin.co.uk, search in 'performance programmes' or scan the QR code above.

5 Estimated Breeding Values and Genomic Estimated Breeding Values (EBVs & GEBVs)

EBVs & GEBVs are expressed in the same unit as the recorded trait (eg kgs for 400 Day Weight, mm for Muscle Depth etc) are relative to the Breed Average.

a) In sale catalogues, **Breed Average** for each trait is represented by the vertical line that is central on the bar chart... **a**

- ✓ Bars that lie to the right of that line indicate EBVs/GEBVs that are above average. The further to the right they lie, the higher above Breed Average they are.
- ✓ Equally, bars that lie to the left of the line indicate EBVs/GEBVs that are below Breed Average. The further to the left they are, the further below Breed Average they are.

b) Accuracy Values (Acc%) are expressed as a % and indicate the quantity and quality of records used to produce each EBV, GEBV or Index. The closer they are to 100%, the more accurate the EBV. Highly accurate values are less likely to change over time. **b**

c) The numeric EBV & GEBV values on the charts can be used to further refine comparison with the breed using the Breed Benchmark which is updated annually.

For more information on EBVs and GEBVs, go to www.limousin.co.uk and search under 'Breed Improvement' in the main menu or scan the QR code opposite.

EBV, GEBV and pedigree information on all Limousin cattle are just a few internet clicks away...

Step 1: Go to www.taurusdata.co.uk

Step 2: In the 'All Breeds Quick Search' box type the name or ear number of the animal you are interested in or click on the 'Breeder Search' button to look at all animals belonging to or bred by a particular breeder.

The site will then tell you the animal's owner/breeder details, its breeding values, its pedigree and list its progeny with full links to all of their information.

6 Adjusted Weights

These are the 'raw' weights recorded for the animal throughout its early growing stages. They are adjusted for age, but are not adjusted for any other factor such as management, nutrition, dam age, differences between farms etc.

For further information or if you have any query, please let us know - telephone 02476 696500, e-mail info@limousin.co.uk or speak to Society staff and Council members attending the sale.

For Enquiries: The British Limousin Cattle Society Tel 02476 696500 Email info@limousin.co.uk

* Where animals have been genotyped, the breeding values for these traits will be Genomic Breeding Values (GEBVs). Publication of GEBVs is at animal owners' discretion. If an animal has not been genotyped, the breeding value will be a conventional Estimated Breeding Value (EBV). Whether a breeding value is an EBV or a GEBV is noted alongside each value.

Please note that EBVs and GEBVs are interchangeable for the same trait. For example, an animal with a Calving Interval GEBV can be directly compared to an animal with a Calving Interval EBV. A link to further information on all EBVs and GEBVs is below.

FOR INFORMATION

Breeding Indexes

EBVs can be combined in to selection indexes to meet wider breeding objectives...

Calving Value	An economic indicator of the collective value of Gestation Length and Calving Ease
Beef Value	An economic indicator of the collective value of Birth Weight, Calving Ease, 400-Day Growth, Muscle Depth and Backfat Depth
Retail Value	An economic indicator of the collective value of Fillet, Striploin, Rump, Topside, Silverside and Knuckle at 600 days of age and a standard carcass weight of 350kgs.

NB: Using Calving Ease and Maternal Calving Ease

Calving Ease EBV *Predicts how easy a bull's own calves will be born.*

Maternal Calving Ease EBV *Predicts how easily a bull's daughters will calve.*

To search the Limousin database by Breeder, by EBVs/GEBVs and/or by Individual Animal go to www.taurusdata.co.uk and click on 'Beef Search'

For more information on EBVs and GEBVs please go to www.limousin.co.uk and click on 'Performance Programmes' or get in touch on the numbers below.

For Enquiries: The British Limousin Cattle Society Tel 02476 696500 Email info@limousin.co.uk

LIMOUSIN

BLCS NOTICE

28 DAY NOTIFICATION FOR REGISTRATION RULE

From the launch of the New Taurus platform, animals that are not Birth Notified or Registered within the first 28 days of life, will NOT be eligible for registration within the herdbook.

*Please Birth Notify any animals approaching 28 days old.

If you wish to register any animal which is over 28 days old (even if it is already birth notified), please ensure it is registered before the launch of New Taurus.*

Look out for announcements later this Spring regarding the confirmed launch date.

Herd Health at British Limousin Cattle Society Sales

The North East Club sale at Darlington Auction Mart on the 16th May 2026 is a CLUB sale.

Premier Collective and Collective Sales and Society Sale of Weaned Calves (Carlisle, December).

Introduction

Herd health rules were introduced by the BLCS at Premier Collective and Collective Sales and the Society Sale of Weaned Calves (Carlisle, December) to standardise herd health declarations and information presented in order to provide both members and customers with clear, accurate herd health information at the point of sale and within the given sale catalogue. As such it is attractive and informative for customers and aims to further raise the level of buyer confidence.

BLCS Premier Collective Sales are Stirling February (bulls) & October (bulls); Carlisle February (bulls), May (bulls), October (bulls) & December (Red Ladies sale); Brecon May (bulls) & November (bulls).

BLCS Collective Sales are Ballymena February (bulls), May (bulls) & October (bulls); Stirling May (bulls); Carlisle June (bulls).

Part 1. Herds selling at the Premier Collective Sales, Collective Sales and the Society Sale of Weaned Calves (Carlisle, December) have to be members of, and adhering to, the terms of a CHeCS approved Herd Health Scheme and at a minimum they must have had a whole herd test for Johne's Disease with a CHeCS approved Herd Health Scheme and must be a Johne's Risk Level 1*- 4.

Part 2. All animals male and female, including calves at foot, presented at the Premier Collective and Collective Sales are required to be EITHER from a BVD Accredited Herd within a CHeCS approved Herd Health Scheme OR to have been BVD tested virus free. Pregnant animals must have had testing and any vaccination completed prior to service. Vaccination of calves at foot to be in accordance with CHeCS guidelines and recommendations.

For the Society Sale of Weaned Calves (Carlisle, December), calves are not required to be vaccinated for BVD. Calves from non-BVD accredited herds are required to have been BVD tested virus free. Calves from BVD Accredited Herds are not required to have been BVD tested virus free.

Herd Health Declaration

The sale entry form is accompanied by a Herd Health Declaration form asking vendors questions for example: TB status; membership of CHeCS (www.checs.co.uk) health schemes (AFBI Cattle Health Scheme, HiHealth Herdcare (Biobest), & Premium Cattle Health Scheme (SRUC) and Johne's, BVD, IBR and Lepto status. Online entries also require the Herd Health Declaration form to be completed.

Is the Herd Health Declaration compulsory?

The Herd Health Declaration is compulsory at all Premier Collective and Collective Sales and the Society Sale of Weaned Calves (Carlisle, December). For reasons of clarity and to provide purchasers with the most accurate information available, vendors are required to complete this at time of entry.

What other health information may be displayed?

It should be noted that the Herd Health information provided in the catalogue relates to whole herd status. Information relating to specific animals entered in the sale should be requested from the vendor.

Vendors are encouraged to apply to their respective CHeCS health scheme for individual animal health cards for display on pens. For an individual animal's test results, or vaccination histories, regarding BVD, IBR, Lepto or Johne's, these are permitted above the sale pens only upon presentation of a signed veterinary declaration to verify that the animal concerned has had a clear test.

The Society has requested that no declarations on health information be given by the auctioneer during the sale. Again, the sole purpose of this is to avoid confusion and to try and ensure that the information provided is done accurately, fairly and in a standardised format in the catalogue. This point has been agreed with the auctioneers.

Johne's Risk Levels

It is a condition of BLCS Premier Collective and Collective Sales and the Society Sale of Weaned Calves (Carlisle, December) that animals from herds that are Johnes Risk Level 5 are not permitted to be sold.

Should you have any queries regarding the Johne's Risk Level classification, please contact your respective CHeCS health scheme.

Breeders, Production, Reduction Sales

BLCS Breeders Sales are Stirling February (females), May (females) & October (females); Carlisle February (females), May (females) & October (females); Brecon May (females) & November (females); Ballymena February (females), May (females) & October (females); Thainstone Multibreed (bulls and females).

Part 1. Vendors at official Society Breeders, Production and Reduction Sales are required to complete a Herd Health Declaration form at time of entry. A condensed version of the given herd health information will appear in the Vendors' Index in the respective catalogue.

All information provided is supplied by the vendor and it is their responsibility to ensure all the details are correct.

Part 2. All animals presented for sale at official Society Breeders, Production and Reduction Sales are required to be EITHER from a BVD Accredited Herd within a CHeCS approved Herd Health Scheme OR to have been BVD tested virus free. Pregnant animals must have had testing and any vaccination completed prior to service. Vaccination of calves at foot to be in accordance with CHeCS guidelines and recommendations.

BLCS SOCIETY SALE TYPES

The British Limousin Cattle Society holds a variety of sale types throughout each year. Here is a reminder of the entry requirements and what they offer to buyers:

	Premier	Collective	Breeders	Weaned Calves	Club
Herd Health Dec required	✓	✓	✓	✓	✓
Must be in a health scheme	✓	✓	✓	✓	✓

Must be BVD Accredited or Virus Free	✓	✓	✓	✓	✓
Must have DNA Parentage Verification & Myostatin	✓	✓		✓	
Must be Registered or Birth Notified within 28 Days if born after 01/01/2020	✓				
Subject to Upset Price	✓	✓			
Subject to Inspection	✓	✓			

***individual club sales rules may vary**

What if a vendor is selling an animal/s that is not home bred or born on another holding?

Vendors are still requested to fill in the Herd Health Sale Declaration accordingly. Prospective customers are still advised to speak to vendors directly regarding additional health information available.

The herd an animal is sold from must have had a whole herd test, for Johne's disease through a CHeCS licenced scheme and in adherence with that scheme's terms.

Animals may not be sold at Society Premier Collective and Collective Sales and the Society Sale of Weaned Calves (Carlisle, December) sale, if the herd of origin (i.e. the holding where the calf was born) has no Johne's status or a status of Risk Level 5.

Any animal bred by a person other than the vendor or born on a holding separate to the vendor's main herd will have the Johne's status of the herd/holding of origin at the time of sale stated in the sale catalogue, along with the Johne's status of the vendor's herd.

The catalogue will indicate who bred the animal if it has not been bred by the vendor. These measures comply with the requirements of CHeCS and the information must be provided by the vendor upon entry of an animal to a sale.

What if a vendor is selling an animal/s managed on a holding other than the vendors?

Any animal that has been managed on a holding other than the vendor's immediately prior to sale will have the Johne's status of that holding stated in the sale catalogue along with the Johne's status of the vendor's herd. These measures comply with the requirements of CHeCS and the information must be provided by the vendor upon entry of an animal to a sale.

Feedback & more information

If you have any questions, please speak to Society representatives, Council representatives or the Auctioneers.

The Castlethorpe Herd Dispersal

Foreword by Johnathon Stacey

The Castlethorpe Herd was first established with the purchase of two 1980-born heifers which were imported from France. The herd was bred up from these two heifers and was becoming well established, I married at this point however and the herd were dispersed to secure the purchase of a house. Thankfully, the herd remained under my watch as I was working as the farm manager for the purchaser Mr. David Bulmer of the Valial Herd. In 1989 a second dispersal occurred when the decision came to sell the Valial Herd, I bought back one in-calf cow of my own breeding with a heifer calf at foot.

As you see these cattle today, I am proud to say that this whole herd descends from that original cow and calf, it is then fair to say that arriving at this point has been a long process. I moved down to Hampshire in the late eighties running my few pedigree Limousin's with a Simmental crossed commercial herd which were put in calf to a home bred Limousin bull. Eventually the commercial cattle were phased out and only the Pedigree herd remained.

I will always be grateful to Mr. John Cook, the owner of the farm in Hampshire, who kindly allowed me to keep the cows and build the Castlethorpe herd up again. Moving through the decades and many things have changed; the Limousin cows have however been a constant. In the past couple of years we have sold the sheep, given up our arable contracting activities and put our own arable enterprise out

to a share farming agreement. Hence, I am now the sole staff member and looking to ease my workload further and that is how the decision came about to majorly reduce the cattle numbers.

Originally the plan was to sell more cows and calves, but due to legislation the calves are required to be over 42 days old at the pre-movement TB test. The herd continues in a much smaller way, having had a few late calvers this year and also five sets of twins we have retained some youngstock but you can rest assured that this is a genuine reduction.

These cattle are sold through no fault of their own, they are a very quiet and easily handled herd and I have intentionally kept towards the more traditional Limousin type. We have focused on double F94L myostatin gene along with calving ease and milking ability traits, the majority of bulls used have had French genetics.

I am confident that they will go on and do well for any prospective purchaser, I am proud of these wonderful cows and their ability to produce top class Limousin's.

Health

The Herd are managed on a very commercial basis and not pushed, the calves are not creep fed normally until just before weaning (or we run out of grass as last year). The herd has been closed, apart from bought in bulls, for the last 23 years.

We do not routinely need to foot trim and no cow being sold today has been foot trimmed.

The females are allowed 3 cycles to get back in calf and if they fail to do so are culled. The first calvers are calved a month earlier than the cows, to give them extra time to regain condition before they are put back to the bull.

There have only ever been 2 caesareans in the history of the herd, one cow had partial-prolapsed before calving, and a heifer this year which was breech and we could not reach the back legs and decided to perform a Caesar rather than ruin a good heifer (32 kg calf)

TB testing is annual as we conform to Biobest TB protocols. Our herd is classified TB10 (the maximum)

Cattle are routinely vaccinated for:

- BVD,
- Bluetongue - vaccinated 7th and 28th November 2025.
- Bovalto Respi 3 - calves vaccinated pre housing (Past, RSV, PI3)
- All young stock are wormed with Ivermectin based meds and flukicide after housing (we are not a big fluke farm, predominantly on gravel and in a low rainfall area)

Certificate of Accredited Status

Issued by CHECS Licensee

Biobest Laboratories Ltd, 6 Charles Darwin House, The Edinburgh
Technopole, Milton Bridge, Nr Penicuik EH26 0PY, UK

This certifies that the herd owned by: Stacey

And kept at: Church Lane Farms, Silchester, Reading, RG7 2LJ

Herd No. UK281600

Holding No. 15/088/0004/01

is registered as

Accredited Free

of

Bovine Virus Diarrhoea since 23 November 2015

and has achieved

Risk Level 1 Johne's Disease Status since 03 December 2013

(54 cattle tested at the last full herd test; of these 3 cattle tested antibody positive and faecal negative.)

Only home bred animals - those whose ear number starts with the Herd No noted above - are covered by this certificate for Johne's disease.

****Bovine Tuberculosis Score 10** since 01 May 2024

**Only home bred animals - those whose ear number starts with the Herd No noted above - are covered by this certificate for bTB.

Azelle is from Kaprico Eravelle's line, bred for easy calving, short gestation and excellent milking figures. Her dam, Kaprico Uzelle, calved at 24 months with a 285day gestation. Almscliffe Alexander, a bull from the 80's, led the Basco EBVs and is still one of the top ten bulls for maternal figures along with Eravelle. A rare opportunity to acquire some of the great old bloodlines.
